

Schedule a no-cost, confidential screening* completed by Neuropsychologists right here at Senior Concerns.

Do you or a loved one have concerns about your memory?

Would you like to know if your concerns are beyond what's reasonable for your age?

Are you worried that you are at risk for dementia?

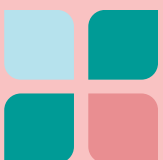

**This will not provide a diagnosis but will help provide you with information and let you know if further testing is recommended.*

Benefits of a Memory Screening:

- Detect cognitive issues early
- Establish a baseline for cognitive health
- Reduce stigma around memory concerns
- Confidential and private

Screenings last about 20 minutes.

Call 805.497.0189 for our next appointment.
